Resolution adopted by the General Assembly on 22 December 2015

[on the report of the Second Committee (A/70/472)]

70/195. Combating sand and dust storms

The General Assembly,

Reaffirming its resolution 70/1 of 25 September 2015, entitled “Transforming our world: the 2030 Agenda for Sustainable Development”, in which it adopted a comprehensive, far-reaching and people-centred set of universal and transformative Sustainable Development Goals and targets, its commitment to working tirelessly for the full implementation of this Agenda by 2030, its recognition that eradicating poverty in all its forms and dimensions, including extreme poverty, is the greatest global challenge and an indispensable requirement for sustainable development, its commitment to achieving sustainable development in its three dimensions — economic, social and environmental — in a balanced and integrated manner, and to building upon the achievements of the Millennium Development Goals and seeking to address their unfinished business,

Reaffirming also its resolution 69/313 of 27 July 2015 on the Addis Ababa Action Agenda of the Third International Conference on Financing for Development, which is an integral part of the 2030 Agenda for Sustainable Development, supports and complements it, helps to contextualize its means of implementation targets with concrete policies and actions, and reaffirms the strong political commitment to address the challenge of financing and creating an enabling environment at all levels for sustainable development in the spirit of global partnership and solidarity,

Recalling also its resolution 69/221 of 19 December 2014 on the implementation of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa,

Taking note of the Regional Programme to Combat Sand and Dust Storms of the United Nations Environment Programme, and also taking note of other initiatives, including the ministerial meeting on sand and dust storms held in Nairobi on 21 February 2013 on the margins of the twenty-seventh session of the Governing Council/Global Ministerial Environment Forum of the United Nations Environment Programme,
Recalling the Sendai Declaration and the Sendai Framework for Disaster Risk Reduction 2015–2030, adopted at the Third United Nations World Conference on Disaster Risk Reduction and endorsed by the General Assembly in its resolution 69/283 of 3 June 2015, and recognizing that one of the priorities for action of the Framework is an understanding of disaster risk for prevention and mitigation and for the development and implementation of appropriate preparedness and effective response to disasters, which continue to undermine efforts to achieve sustainable development,

Acknowledging that, based on the notion of hazards as defined in the Hyogo Framework for Action 2005–2015: Building the Resilience of Nations and Communities to Disasters,¹ addressing multidimensional hazards, including those posed by dust and sandstorms, contributes towards the achievement of the goals, targets and priorities for action set out in the Sendai Framework for Disaster Risk Reduction 2015–2030,

Emphasizing the relevance of the efforts and cooperation of Member States at the regional and international levels to control and reduce the negative impacts of dust and sandstorms on human settlements in vulnerable regions, taking note of the initiative of the Islamic Republic of Iran in hosting a regional meeting of environment ministers in Tehran on 29 September 2010, and welcoming the holding of other meetings with the active participation of all countries,

Stressing the need for cooperation at the global and regional levels with a view to preventing and managing dust and sandstorms through the development of early warning systems and the sharing of climate and weather information to forecast dust storms and sandstorms, and affirming that resilient action to combat sand and dust storms requires a better understanding of the severe multidimensional impacts of dust and sandstorms, including the deterioration of the health, well-being and livelihood of people, increased desertification and land degradation, deforestation, loss of biodiversity and land productivity, and their impact on sustainable economic growth,

1. Recognizes that dust and sandstorms, and the unsustainable land-management practices, among other factors, that can cause or exacerbate these phenomena, pose a great challenge to the sustainable development of affected countries and regions, also recognizes that, in the past few years, dust and sandstorms have inflicted substantial socioeconomic damage on the inhabitants of the world’s arid, semi-arid and dry subhumid areas, especially in Africa and Asia, and underscores the need to treat them and to promptly undertake measures to address these challenges;

2. Acknowledges the role of the United Nations development system in promoting international cooperation to combat sand and dust storms, and invites all relevant bodies, agencies, funds and programmes of the United Nations development system, including the United Nations Environment Programme, the United Nations Development Programme, the World Meteorological Organization, the World Health Organization, the secretariat of the United Nations Convention to Combat Desertification in Those Countries Experiencing Serious Drought and/or Desertification, Particularly in Africa, and all other related organizations to address this problem and contribute to the enhancement of capacity-building, the implementation of regional and subregional projects, the sharing of information, best practices and experiences and the boosting of technical cooperation in the affected

countries and countries of origin, to improve the implementation of sustainable land management practices and the development of early warning systems as tools to combat sand and dust storms in accordance with their strategic plans;

3. **Encourages** regional, subregional and interregional organizations and processes to continue to share best practices, experiences and technical expertise in combating dust and sandstorms, including through improved implementation of sustainable land-management practices, and to promote regional cooperation on this matter;

4. **Invites** all affected Member States as well as relevant entities of the United Nations development system, regional organizations and other relevant stakeholders to endeavour to meet the objectives set out in the present resolution;

5. **Requests** the Secretary-General to circulate to the General Assembly at its seventy-first session the report entitled “Global assessment of sand and dust storms”, which is being prepared by the United Nations Environment Programme in collaboration with other relevant United Nations entities, in the language in which it has been issued by the Programme.

*81st plenary meeting*
